

AromaPro Scent Machine Essential Oil Diffuser

The AromaPro Scent Machine oil diffuser is designed for medium to large spaces like gyms, hotel lobbies, casinos and airports.

The AromaPro allows you to permeate up to 4,000 square feet of space with your favorite fragrances. Do you have a smaller space? No worries. You can change the aroma intensity levels accordingly and automate the process with an internal digital timer. Heck, set the Scent Machine to be active only during your store's open hours as well so that you don't have to worry about having one more chore to do.

This is a free standing, seven pound unit that you can also connect through your HVAC/AC system. HVAC/AC is recommended if you want to infuse multiple areas at once. For example, hotel managers can take care of all of their corridors with one machine. Whatever option you choose, you will need a 110-240V power source to begin infusing your place of business with heavenly aromas.

The AromaPro is a portable diffuser that uses cold-air diffusion technology. You can expect a consistent scent without high or low points in the diffusion process. You are in control of the strength or subtlety of the scent.

One of the greatest things about this machine is that the nanoparticles leave no residue on glass windows, televisions or anything else. You don't have to worry about the extra cleaning.

The 36 month all-inclusive rental plan comes with a steady complementary supply of the aroma oil of your choice with free shipping. If you opt out of the all-inclusive plan and rent month-to-month, you will receive a 500ml bottle of your chosen scent every four months. You can always order more if you run out.
