What is Brain-Tap Technology?

Brain-Tap Technology is an "instant meditation" and "express elevator" that activates dormant areas of the brain. Your fingers are used to tap areas on the forehead that correspond to different parts of the brain. Depending on which finger and where on the forehead it touches, various levels of brain activity,

intelligences, and abilities can be "tapped" into. Practitioners experience deep silence, greater intuition, and the ability to shape their lives to match their desires.
